

## Response to Testing

### Home Page

- First impression of new Home page was very positive
- Likes the small pictures depicting content and actions
- Easy to distinguish between items

### TV Page

- Liked having access to old TV footage of leaders
- After watching content found it difficult to get back to Home Page

### Events Page

- Very important as many events are over before anyone knows about them
- Liked maps associated with each event
- Found it difficult to get back to Home page

### Surveys / Elections Page

- Would use these
- Liked the ability to add additional comments while doing survey

### Chat Page

- Not familiar with chat in general
- Found concept confusing and doubted if they would ever use it
- Liked the idea that they could interact directly with leaders via chat ( photo )

### Home page vs. Home#2

Preferred cHome#2 because

- Home#2 simpler than Home page. Home page a bit cluttered ( photo )
- Like the TV guide approach, i.e. left to right for accessing content ( photo )
